

Brand New SCHWEGLER Competence Field Tooling solutions for Aerospace Assembly

- Customized high performance solid carbide and PCD cutting tools
- Application specific development of cutting tools, including the right choice of carbide grade, cutter geometry and coating
- For high precision drilling of multiple stack combinations of composites, titanium, aluminum and heat-resistant super alloys
- Drilling tools for manual, semi-automated and automated applications
- Very skilled and experienced team of experts in aerospace assembly drilling
- Very quick conversion time of projects
- Short lead-times in the production of our cutting tools
- "Schwegler drilling laboratory" for drilling trials, pre-qualification and measurement reports
- Strategic partnerships with leading drilling machine builders and power-feed system manufacturers
